Gas fires and Surrounds for UK homes

Global 40

Global 70XT

Global 40 Ceraglass | Aura surround
Global 40 Natural Brick | Aura surround (inset)

Global 40 is a contemporary gas fire that is designed for the traditional Class 1 British or Irish chimney. It has a beautiful log fire display powered by remote control and runs on natural gas or LPG.

It can be combined with two British made solid stone fire surrounds. Aura has a classic design and Eclipse a more futuristic feel.

Both Aura and Eclipse surrounds have fitted lights under the mantels for extra effect.

There are two optional interiors: Ceraglass for extra depth of flame and Natural Brick. And for those that wish to install the fire without a surround, there is a choice of outer frames.

Global 40 Ceraglass | Eclipse surround (inset)

The Cara gas fire suite combines the impressive Global 70XT gas fire with a modern, micro-grain marble fire surround.

The fire is available in balanced flue and conventional flue versions, so it can be installed with or without a chimney. It has a beautiful, realistic log fire display, with a choice of smooth black or classic brick interiors. And with a heat output of up to 7 kW, it can heat a larger than average living room.

Global 70XT Black | Cara surround

The Grace gas fire suite combines the impressive Global 70XT gas fire with a classic, solid limestone fire surround.

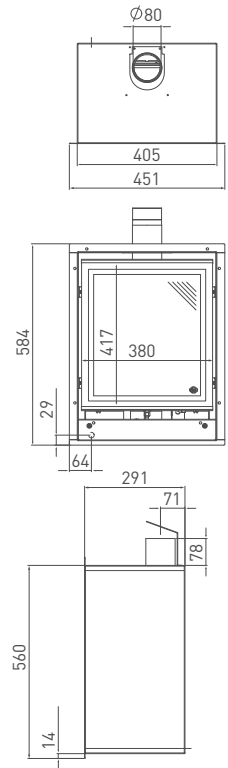

There is also a choice of smooth black or classic brick interiors.

Both versions of the Global 70XT fire are operated by electronic remote control.
